

PROFESSIONAL SERVICES

on365 is an independent specialist provider of energy efficient Data Centre and critical physical infrastructure services for public sector, SME and corporate clients across the UK and Europe.

The Challenges

Data Centres are undoubtedly the workhorses of today's economy however as the Data Centre market dynamically evolves to cater for an abundance of technology changes, it has become ever more challenging for the Data Centre operator to manage and control the specialist services and systems required in-house.

With virtualization, consolidation and the Cloud, the demand for expertise and experience to strategise, deliver, manage and control the Data Centre is higher than ever. Added to which Data Centres have never been under so much scrutiny in regards to cost, return on investment and the need to always be there.

The Solution

Utilising **on365** Professional Services can help you control management costs, reduce complexity, and focus your efforts where they make the most impact. Whether you want to augment or integrate your Data Centre environment, **on365** can help develop a plan that addresses your specific requirements and yields measurable results including improved strategic planning capabilities and improved application and infrastructure performance.

Our product specialists will guide you through the myriad of opportunities available covering all aspects of the Data Centre's physical infrastructure from CCTV to IT performance metrics. At the same time we'll look at your current infrastructure, budget constraints and business needs for both now and tomorrow. You can choose a specific area or take the holistic route and engage at the level that suits your budget and needs.

► PROFESSIONAL SERVICES

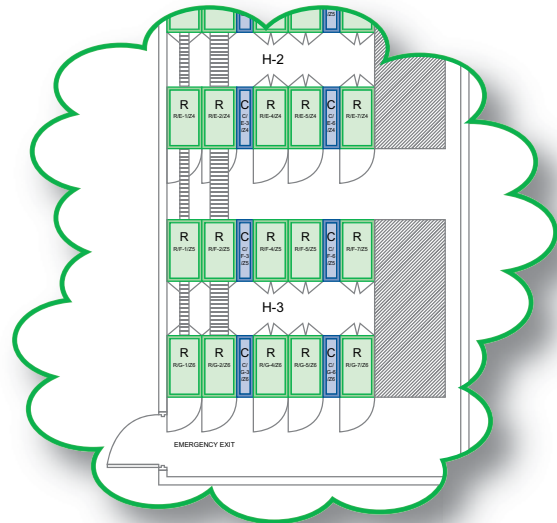

The Benefits

As a Data Centre operator you can call on **on365's** resource, expertise and technology knowledge to assess your Data Centre's physical infrastructure as and when you need it.

Whether it be a review and generation of a new security plan or the need to find more cooling from your existing plant, **on365** has the people with the in-depth knowledge and experience to help you.

All engagements are independent of any vendor and will deliver honest and frank advice as to the best way forward. You will be guided through the options with full details of capital and operational costs with ROI sums to support your business case.

- **on365** provides personal attention. We work with you to provide a perfect fit for your requirements.
- We provide outstanding IT help and support and a genuine commitment to customer service.
- We are approachable and easy to work with.
- We take on the challenges that you don't want to - and we integrate our services to fit with your organisation and preferred way of working.

Why on365

on365 is the UK's leading provider of critical power and cooling services for the Data Centre. Our Professional Services Consultants have proven experience in the design, build and operation of Data Centres and the critical systems that support Data Centres.

With over 250 years of combined Data Centre experience, the **on365** Professional Services team has literally lived and breathed

the massive changes that have taken place in the Data Centre market. Whether it's assessment, design, migration or consolidation, we understand the technologies involved as well as the issues and real life benefits for your business and can provide the necessary knowledge and resource on the latest technologies to handle projects in entirety or work alongside your internal team as required.

"Great job done by your team as usual. Surprised most people here how quickly it was done, mainly down to the planning and prework by yourselves"

Keith Bell
BP
